Hi Leonid,
There is earlier paper by Hauptmann (2003) on the LHP tumors and a paper by Blair 1990 that discusses the correlation between exposure metrics that I am sending. I may have sent a paper on an embalming cohort which you can disregard.

Ex. 5 Deliberative Process (DP)

being conducted using these data funded by the ACC, expected publication during 2015.

Jennifer can update you on our dose-response approach when we meet next week and Tom has a detailed understanding of the studies.

-Barbara

Thanks. Looks like more than I bargained for!
Several follow-up questions:
Which outcome(s) are considered for quantification?
What paper is better for understanding their exposure estimates - may be one of earlier ones?
Is there another update they are working on publishing?

The cohort is the NCI industrial cohort. I'll attach them here.

Barbara, is there a published paper on formaldehyde cohort that we will be talking about? Can you share it.

Thanks
Leonid
